Report

"A fair deal for South West Norfolk" urges Christopher Fraser MP

Campaigning for community services

Over the last ten years local banks, shops and pubs have closed in rural areas across South West Norfolk. This has had a devastating effect on our small towns and villages. Our local post offices are therefore essential amenities. Christopher is campaigning for greater freedom for sub-post offices to offer a wider range of products and services so they serve more customers and stay viable at the heart of our village communities.

Campaigning for our hospitals

Working with Local Councillors and the League of Friends, Christopher has been campaigning on behalf of community hospitals across Norfolk. He was greatly encouraged by the announcement that intermediate care beds will be retained at Swaffham Community Hospital, but recognises that there is a great deal of work to do to secure the long-term future of in-patient care in the town so that the needs of the community are met. He is also fighting to keep services open at the Queen Elizabeth, the Norfolk & Norwich and other hospitals serving Norfolk.

Campaigning for our roads infrastructure

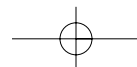

Since his election, Christopher has been lobbying the Government to upgrade the A11 east of Thetford at the earliest opportunity to unlock the economic potential of Norfolk. Christopher says: "Norfolk remains the only county in England without a dual carriageway to the national trunk road system." He welcomed the Government's recent backing for the scheme, when the Highways Agency was instructed to press ahead with the statutory preparation work. He is campaigning for investment in our A-roads north and south, east and west, to cut down on rat-runs and reduce the speed and weight of traffic through villages.

Campaigning for flood relief for Norfolk

People from across the area whose homes, business and daily routes were affected when local roads were flooded for up to 100 days last winter are desperate for a solution. Christopher has secured the support of the Environment Agency to work for a sustainable, long-term solution, and forced the Government to acknowledge that people of this area have as much right as anyone to expect a solution to their plight.

Is there an issue you want to raise with Christopher?
